

On average, a person rolls their window up and down 4 to 5 times a day. That's over 1,825 times a year! All ACI® window lift regulators are thoroughly tested and validated for fit, form and function before being added to our product offering. ACI prides itself on doing the work of validation in house with our library of over 500 automotive doors to make sure your customers aren't doing the work for us.

- Designed to work with original equipment window motors
- Validated for form, fit and function
- Exact drop in replacement
- Select regulators have been redesigned, replacing slides with rollers to extend cable life
- Premium grease for longer life

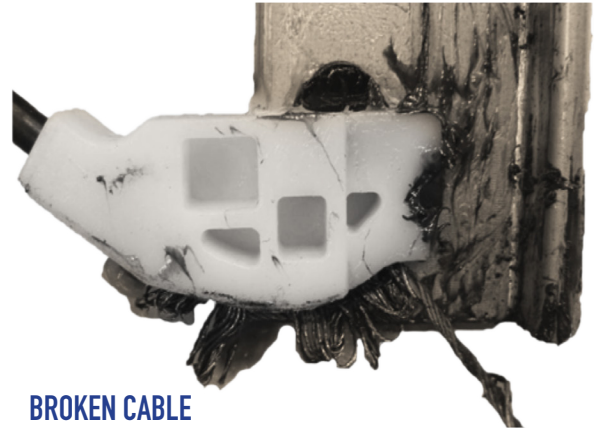

# Common Failures of Power Window Regulators

All ACI brand window lift products meet our stringent product validation standards and in many cases offer a design improvement over the O.E.

CABLE TYPE

BROKEN CABLE

Cables wear, fray and eventually break disabling the window & damaging other components.

SHEAR TYPE

STRIPPED TEETH

Shear teeth wear and strip disabling the gear components which can also cause the motor to fail.
